

Gross Domestic Product (GDP) by Industry at Basic Prices 2015

Highlights:

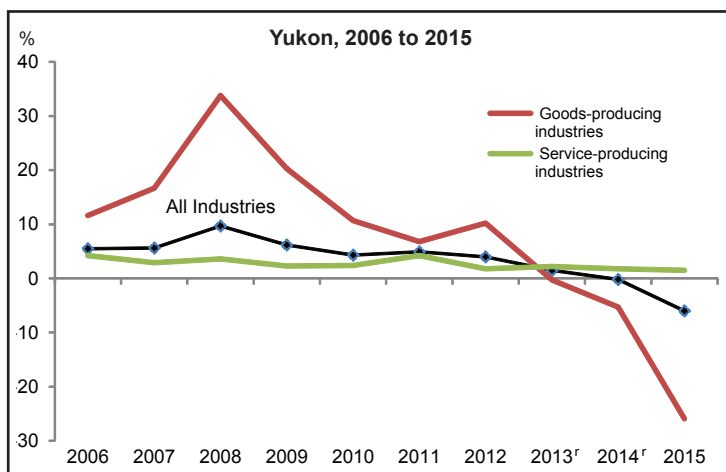

- Yukon's real GDP by industry for 2015 was \$2,193.1 million (in chained (2007) dollars); a contraction of 6.0% following a 0.2% (revised) decline in 2014.
- In 2015, the largest dollar-amount decrease was in the *Mining, quarrying, and oil and gas extraction* sector, with a contraction of \$198.2 million, down 41.7% from 2014. The largest dollar-amount increase was in the *Real estate and rental and leasing* sector with an expansion of \$7.3 million, up 2.4% from 2014.

Growth Rates of GDP by Industry (based on real GDP in chained (2007) dollars)

Over the past ten years, the growth rate of Yukon's GDP by industry varied from a low of -6.0% in 2015 to a high of 9.7% in 2008. In 2009 through 2012, the high growth rate continued with an overall declining trend. The growth rate slowed down in 2013 and became negative in 2014.

Note: The current calculation of GDP is based on the input-output structure of the economy in 2013 (benchmark year). Substantial revisions in subsequent years can occur due to updated benchmark year. Please see endnote 2 on page 8.

In 2015, Yukon's GDP in the *Goods-producing* industries declined 25.9%, while the *Services-producing* industries recorded an increase in GDP of 1.5%.

Between 2006 and 2015, the GDP growth rate for the *Goods-producing* industries fluctuated considerably (from -25.9% in 2015 to 33.8% in 2008) due mainly to activities in *Mining, quarrying, and oil and gas extraction*. However, the GDP growth rate for the *Services-producing* industries fluctuated within a relatively narrow margin (from 1.5% in 2015 to 4.2% in 2006 and 2011) over the same period.

The GDP of an industry represents the value added by labour and capital in transforming inputs purchased from other industries into output. This analytical report presents Statistics Canada's latest estimates of Yukon's real GDP by industry at basic prices in chained (2007) dollars. These figures are subject to revision.

GDP is one of the primary economic indicators used by decision-makers within the governments and financial and other institutions to evaluate the health of the economy. A large increase in real GDP is interpreted as a sign that the economy is doing well, while a small or negative increase indicates poor economic performances.

Growth Rates of GDP by Special Industry Aggregation, Yukon, 2006 to 2015 (based on real GDP in chained (2007) dollars)

- The GDP growth rate in *Industrial production* fluctuated hugely between 2006 to 2015, from -35.9% in 2015 to 81.9% in 2008.
- The *Energy* sector's GDP growth rate ranged from -22.4% in 2009 to 16.1% in 2006.
- The *Information and communications technology* sector's GDP growth rate had a relatively lower fluctuation and varied from -1.3% (revised) in 2014 to 14.0% in 2010.

Growth Rates of GDP by Industry, Yukon, 2011 to 2015 (based on real GDP in chained (2007) dollars)

Between 2011 and 2015, the majority of Yukon industries experienced both positive and negative growth rates. The largest fluctuation occurred in the *Mining, quarrying, and oil and gas extraction* sector where the growth rate fluctuated from a low of -41.7% in 2015 to a high of 56.6% in 2012.

Percentage Share of GDP by North American Industry Classification System (NAICS), Yukon, 2015 (based on current dollars)

Major contributors to Yukon GDP by industry in 2015 were: *Public administration* (23.6%); *Real estate and rental and leasing* (14.5%); *Mining, quarrying, and oil and gas extraction* (10.1%); *Health care and social assistance* (9.1%); *Construction* (8.5%); *Retail trade* (5.5%); and *Educational services* (5.1%). The contribution of each of the remaining industries was less than a 5.0% share.

Percentage Share of GDP by North American Industry Classification System (NAICS), Yukon, 2011 to 2015 (based on current dollars)

Over the five-year period from 2011 to 2015, the share of *Mining, quarrying, and oil and gas extraction* industry in total GDP fluctuated from a low of 10.1% in 2015 to a high of 17.4% (revised) in 2014, while the share of *Construction* industry varied from 8.2% (revised) in 2014 to 11.7% in 2011. With the exceptions of *Public Administration* (1.8% share); *Health care and social assistance* (1.6% share); and *Real estate and rental and leasing* (1.5% share), all remaining industries accounted for a 1.0% or less fluctuation, in their share, during those five years.

Information and communication technology sector ³	46.3	47.5	50.6	51.4	58.6	62.2	61.4	62.4	61.6	61.0
Energy sector ⁴	51.9	52.1	58.5	45.4	46.8	46.2	47.6	40.8	34.9	31.5

¹ See endnote on page 8.

² *Industrial production* - combines the North American Industry Classification System (NAICS) codes 21, 22, 31-33, 562.

³ *Information and communication technology sector* - combines NAICS codes 334 (excluding 3345), 4173, 5112, 517, 518, 5415, 8112.

⁴ *Energy sector* - combines the North American Industry Classification System (NAICS) codes 211, 2121, 21229, 213111, 213118, 2211, 2212, 32411, 486.

Did You Know?

According to a 2016 special tabulation from Statistics Canada, National Economic Accounts Division, an estimated \$55 million (current dollars) was not included in Yukon's 2013 GDP by Industry account due to the underground economy. This total was comprised of: \$17 million in *Residential construction*; \$12 million in *Finance, insurance, real estate, rental and leasing and holding companies*; \$7 million in *Accommodation and food services*; \$5 million in *Professional, scientific and technical services*; \$3 million in *Retail trade*; \$2 million in *Administrative and support, waste management and remediation services*; \$2 million in *Other services (except public administration)*; \$1 million in *Health care and social assistance*; \$1 million in *Manufacturing*; \$1 million in *Transportation and warehousing*; \$1 million in *Wholesale trade*; \$1 million in *Owner occupied dwellings*; and \$1 million in *Arts, entertainment and recreation*.

Publication data source: Statistics Canada CANSIM 379-0028 and 379-0030.
(Historical data covering the period 1997 to 2015 are available upon request.)

Endnotes:

¹ Statistics Canada uses the chain Fisher volume index method of calculating the real GDP. This method was adopted as it produces the most accurate measure of growth in GDP and its components, and the change brings the Canadian measure in line with the US quarterly Income and Product Accounts which also use the chain Fisher formula to measure real GDP.

An important consequence of using chain indexes is that the associated volume measures are not additive. That is, the sum of the chained values for each component of an aggregate does not equal the chained value of the aggregate. For example, the sum of the components of the Transportation & Warehousing Industry is not equal to the number given for that industry, just as the sum of the individual industry sectors is not equal to the number given for All Industries.

For more information on chain indexes, visit: <http://www.statcan.gc.ca/nea-cen/gloss/iea-crd-eng.htm>

² The most recent benchmark year for which the input-output structure of Yukon's economy is measured is 2013 and therefore it is the most current year for which the contributions of different industries to GDP may be accurately measured. GDP calculations for subsequent years are projections based on the structure of Yukon's economy in 2013 and changes in prices and output volumes in intervening years. Substantial revisions to these estimates can occur if there are major changes to the structure of the economy; for example, the opening or closing of a large mine after the most recent input/output accounts reference year.
